

I recommend that the FCC reject Petition 04-160 submitted by the NAB. This infringes on my rights to pay for XM-radio programming in order to avoid the constant talking and extreme advertising that takes place on broadcast radio. Also, area radio stations do not do a good job of traffic or weather reporting - correct "up to date" information is not provided on a timely basis. Broadcast radio is more interested in ratings, advertising, and talking than playing quality music. Recently when I changed automobiles, I did not have XM-Radio for a week. That Saturday I went out and purchased an XM-Radio as I really enjoy the programming from the various types of music, Comedy, Traffic, Weather, news, sports, etc. Whatever I want to listen to, when I want to listen to it.
